Miller's 1961 Nursery Guide

25th Anniversary Edition

"5 IN 1" DWARF APPLE

Five of our best Apple varieties are budded on a single tree to give you tasty, tree ripened fruit over the entire Apple season. The five varieties provide perfect pollination so you are sure of having good crops of fruit every year. The trees start to bear the first or second year after planting and continue to bear for years to come. Makes a nice ornamental with clouds of pretty white blossoms in spring and colorful, delicious fruit from summer to late autumn. A distinctive small tree for the lawn or for the back yard or garden. These small growing trees require little space. You can plant them 10-12 feet apart and they will grow to about 8-9 feet high. They are easy to care for and most of the fruit can be picked from the ground without using a ladder. Fruit on these dwarf trees is usually larger and better colored than on a standard tree and they are hardy enough to stand extreme cold.

Five choice varieties on each tree: Red Delicious, McIntosh, Cortland, Yellow Transparent, Northern Spy.

2-yr., 4-5 ft. branched trees, $4.50 each.

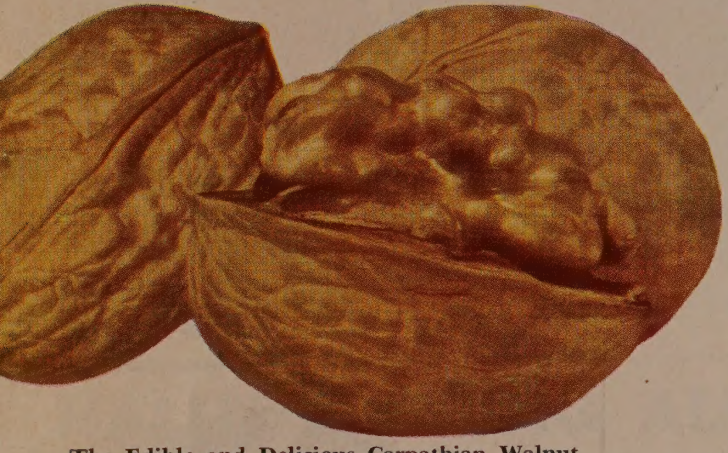
New Hardy CARPATHIAN WALNUT

(Circassian Walnut)

The Greatest Tree Find of the Century



The Edible and Delicious Carpathian Walnut

Rev. Paul C. Crath, engaged in missionary work in the Carpathian Mountain highlands, noted these hardy English Walnuts growing in this severe climate, where winter temperatures go to 40-50 below zero. One tree produced 1300 pounds of nuts in one season. Rev. Crath carefully selected nuts from about 50 of the finest trees to bring back to his home near Toronto, Ontario. This was some 20 years ago. Trees from these nuts have now fruited regularly and have proven perfectly adapted to our cold northern climate. The trees from which we get our propagating stock were planted in 1932. They survived the coldest winter on record in New York State in 1934 when 30 below was recorded. Today the largest are 35-40 feet tall and produce annual crops of high quality, thin shelled nuts that are superior in quality to the California product. No bitterness, large well filled kernels that come out whole. No disease problem or spraying necessary. Fast growing—up to three feet per year. Plenty of cool dense shade, glossy dark green leaves, a tree that produces more than shade. We are one of only a few nurseries in the U. S. with a pure Carpathian strain Walnut. Nuts vary in size from that of the California English Walnut to three times this size. Nuts fall from hull. The tree is an early producer of superior quality nuts. Plant two or more trees to insure adequate pollination with larger crops of nuts. Plant Miller's genuine Carpathians. You can be sure that they are the true hardy type. We grow them from a pure, heavy bearing strain.

Be sure and get Miller's pure strain of Carpathian Walnuts. We have one of the few pure hardy strains available today.

PLANT NUT TREES For

You Can Grow These Difficult To Buy Nut Delicacies and Enjoy Their Ornamental and Shade Giving Benefits

← Barcelona Filbert Filberts make excellent small trees besides producing tasty, easy to crack nuts.

FILBERTS (Hazelnuts)

Filberts are easy to grow and will succeed wherever it is possible to grow Peaches. Fully grown trees compare in size with a Peach or Plum tree. They are free from disease and require no spraying. The trees start to bear the second or third year after planting and our named varieties produce large nuts that are easy to crack, high in food value and very tasty. Nuts mature in early September and drop free from the husk.

Planting and Care. Filberts sucker freely and these must be removed from the base of the tree or a bush will result. Plant the same as a fruit tree. Filbert trees are not self-fertile and more than one variety must be planted or no nuts will be produced. Cultivate or mulch the trees for the first few years.

BARCELONA. Nut very large, round, fine flavored. Tree very vigorous and productive. An important commercial variety in Oregon. Ripens early September.

DUCHILLY. Nut is large and long. Tree upright in habit of growth and vigorous. Very productive. Nut cracks easily and is very fine in quality. Ripens early September.

DAVIANA. Nut medium to large. An excellent pollenizer for Barcelona. Tree is smaller than other kinds. Produces delicious thin shelled nuts. Ripens with Barcelona.

1-yr., 2 to 3 ft. trees, $2.95 each; 3 for $8.25. 1-yr., 3 to 4 ft. trees, $3.25 each; 3 for $9.00.

Moorpark Apricot

THOMAS BLACK WALNUT

Large, Thin Shell—Cracks Easily—Delightful Flavor

Our native Black Walnuts are just about the tastiest of all nuts but the nuts are often small and the meats are so hard to extract that it seems hardly worth the effort. Thomas was selected from thousands of trees growing in our country because it produces large nuts that crack easily. Here is why Thomas is one of the most valuable nut trees you can plant. The nuts are uniformly large with a thin shell that cracks easily. The meats are large and plump, with a delightfnl flavor found only in the Black Walnut and they come out of the shell easily in halves and quarters. Our tree grows rapidly. Our trees are grafted to retain all of these desirable characteristics and grafting also has the effect of producing early bearing in Black Walnuts. Grafted Thomas Black Walnuts start bearing the second or third year after planting and are soon in good production. Trees should be planted 40 to 50 feet apart and they grow best on a rich moist soil but will grow on any deep soil of average fertility. Two or three trees will make a nice home planting, but, if you have room plant more because the big plump meats that come out so easily sell for high prices and make an attractive profit-making project.

A Few Nut Trees Supply Plenty of Shade and Nuts for the Average Family

Cool Summer Shade - Tasty Nuts in Autumn

NEW, HARDY CHINESE CHESTNUT TREES

Welcome Shade—Fine Flavored Nuts

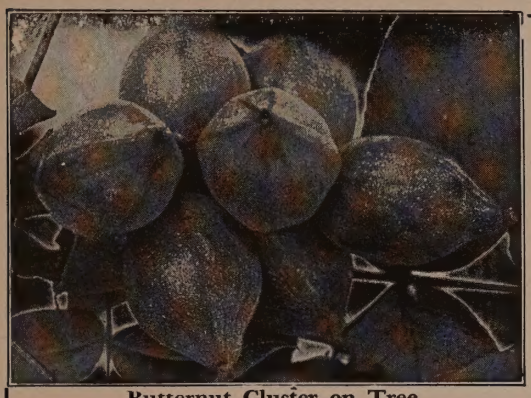
A hardy, blight resistant tree that the U. S. Dept. of Agriculture introduced here from China to take the place of our native American Chestnuts destroyed by Chestnut blight. Chinese Chestnuts average larger than our native varieties and actually are better in quality. They grow quite rapidly in a spreading form and produce nuts in about three to four years. Trees should receive clean cultivation until August 1st or use heavy mulch treatment. Use no fertilizer the first year. Subsequent years, fertilize, cultivate or mulch as for fruit trees. Two or more trees required to produce nuts. Spring planting best. Plant a few trees this spring. The nuts are really delicious and the trees ornamental.

	Each	3	10
3 to 4 ft.	$3.25	$8.95	$27.00
2 to 3 ft.	2.50	6.00	18.00

Plant A Few Chestnuts This Year

We get glowing reports from all of the Eastern states and it seems even better suited to the Southern states. A few trees that are very easy to grow will easily supply the average family with all they can eat and as the trees grow older there should be some to sell. It can be classed as a dual purpose tree, furnishing nice shade and a sweet, fine flavored nut. There are no important insect enemies and except for cultivation very little care is required. It is practically immune to the Chestnut blight that killed all of our native Chestnuts, and we are very fortunate to have such a fine tree as a replacement.

Don't confuse it with the coarse, poor quality Italian Chestnut sold in stores. It is so much better there is really no comparison. Why not plant a few trees along the farm fence row or in the back yard to supply both shade and fine, tasty nuts. **See page 2 for colored picture.**

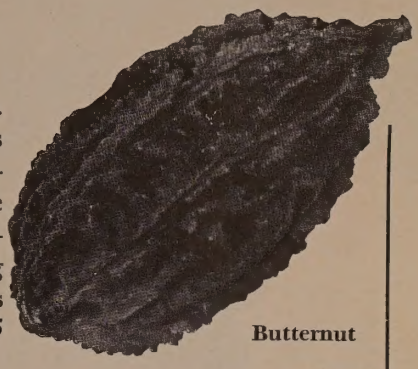


Butternut Cluster on Tree

AMERICAN BUTTERNUT

A Long Lived Decorative Tree for Garden or Park Areas

One of the most tasty of our native nuts. Everyone likes them for baking, confections and eating fresh. A heavy crop of nuts is produced each year by this hardy member of the Walnut family. Attractive foliage and spreading top provide abundant shade. Bears young and tolerant of moist soils. Plant two trees for better nut production. **4-5 ft. trees, $2.25 each; 2 for $3.95.**



Butternut

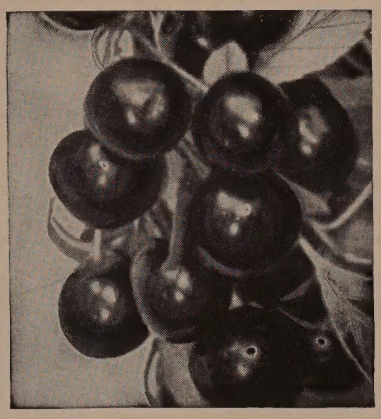
APRICOTS

EARLY GOLDEN. A smooth, fuzzless Apricot of medium size. Color pale orange; freestone, highly flavored and of the best quality. A fine variety to plant with Moorpark. Ripens mid-August. Apricots are not difficult to grow and the fruit is highly prized for making preserves, canning, and home use. The trees are also very ornamental, producing a mass of white blossoms in early spring.

MOORPARK. A very large, attractive Apricot with a red cheek. Best quality and richest flavor of all Apricots. Tree hardy and productive. Ripens early August.

APRICOT PRICES

2-yr., 4-5 ft., each $2.10; 3 for $5.95.



The New Small Size

HALL'S FRUITING ALMOND

The original tree was discovered near Independence, Kansas; it has produced regular crops of nuts for long enough now so its hardiness and productiveness is well established.

The Almond is a very close relative of the Peach, and the blossoms, foliage, and growth habits are much the same. Our trees are budded. Peach-like fruits open in Sept. and the nut falls free. For better crops of nuts interplant a Peach for pollination.

Hall's Fruiting Almond grows into a shapely ornamental tree besides bearing regular crops of tasty, high quality nuts that are the equal of any purchased in the stores. In the spring the branches are covered with beautiful blossoms followed by the many fruits that develop into nuts. It is a very fast growing tree and starts bearing two to three years after planting. Nuts ripen from late August through September. Hall's Almond will grow and produce well wherever Peaches can be grown. It will stand as much cold as a Peach tree without injury. Soil requirements are the same as for a Peach and it will grow and bear well on any well drained soil of average fertility. Plant and care for them the same as you would a Peach tree.

Reserve a place in your home planting for this most unusual and beautiful tree. You will not only have the pleasure of watching it grow but the many crops of delicious nuts will pay for the cost of the tree many times over. **Prices: 3 to 4 ft. trees, $2.95 each; 2 for $5.60. 4 to 5 ft. trees, $3.25 each; 2 for $6.20.**

HANSEN IMPROVED BUSH CHERRY

An ornamental shrub, producing edible fruit. Fruit is large, black, and sweet. Good to eat right from the bush. Introduced by Dr. Hansen of the South Dakota Experiment Station. The silvery green leaves turn red in autumn and the pretty white blossoms add to landscape effect in the spring. Dwarf growing, 4 to 5 ft. Can be trimmed. Usually bear fruit the first year after planting. Plant at least two bushes for better fruit production. **95c each; 2 for $1.70; 10 for $7.50.**

You Can Grow These Difficult To Buy Nut Delicacies and Enjoy Their Ornamental and Shade Giving Benefits

Miller's BETTER GRAPES

Grown in the Finger Lakes Grape Region

Outstanding Sheridan Grape

MID-SEASON GRAPES
(Sept. 15-25)

DELAWARE. Clusters medium, compact, attractive. Fruit excellent in quality, perhaps the best of all red Grapes. Vines hardy and productive. Vigorous on good soils. No planting is complete without a few vines of this fine variety.

NIAGARA. Best known white Grape. Clusters and berries large. Quality very good, sweet, juicy. Vine vigorous, hardy, productive.

CONCORD. The most widely grown commercial blue variety. Fine for jellies and Grape juice. Vine very vigorous, hardy and productive.

LATE GRAPES (Sept. 25-Oct. 10)

SHERIDAN. The best late blue Grape and one of the finest of all Grapes. Will keep in good condition until after Christmas. Clusters and berries are very large, compact. Quality excellent. Very sweet, delicately flavored. Vigorous, hardy and so productive that it requires close pruning to prevent overbearing.

CATAWBA. Clusters large, well formed. Quality very good. One of the best late red Grapes. Keeps well after picking until late December.

SEIBEL No. 1000. A new French hybrid that makes a superior wine. Vine is very vigorous and hardy. Will stand 20° without injury. Requires no spraying. Clusters medium, light blue berries that are medium to small. Ripens late September.

GOLDEN MUSCAT An amazing new variety producing huge clusters of golden delicious fruit. Very similar to the California Grapes but produced on a vine that is hardy in cold regions. Mature vines in our vineyard each year produce clusters weighing 1½ to 2 pounds. Berries are oval, and a beautiful light golden color when fully matured. Quality is excellent, sweet, juicy, and highly flavored. Vine is vigorous, hardy, and a good producer. Needs a long season to ripen fully but is well worth a trial wherever it has a possible chance of succeeding.

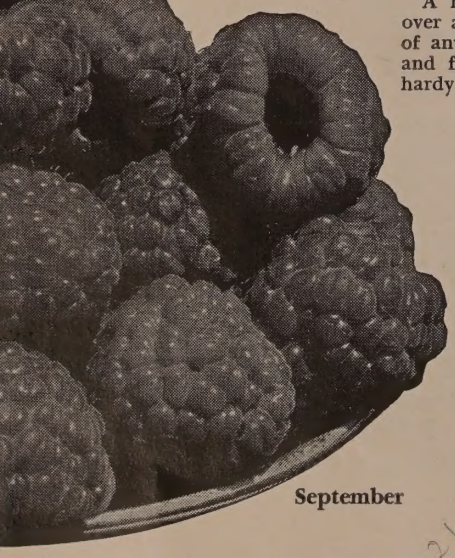
LATHAM—Red

Because of its heavy bearing, high quality, and adaptability to many types of soils, it is the most popular and best variety to plant. Plants are extra hardy. The large, firm berries are excellent for home use and canning. Ripens a few days after Taylor.



September

TAYLOR—Red

A heavy producer of large, conical, light red berries, often over an inch long, very firm, and have the most delicious flavor of any Red Raspberry. First berries ready to pick by July 6th and for the next three weeks bushes are heavy with fruit. A hardy, vigorous grower for home and commercial plantings.

EVERBEARING SEPTEMBER

Yields Fine Crops From Georgia to New York State

Two crops each year, one in June and another abundant crop in September. The early maturing fall crop insures ripe fruit every year. You'll find September easy to grow, the most disease resistant of any red berry, very winter hardy and a vigorous grower. You'll get big juicy bright red berries that are sweet and won't crumble.

This new berry was developed by the New York State Experiment Station. They report that it grows exceptionally well in the South with very favorable comment from as far south as Georgia. Our plants are from the original stock from the New York State Experiment Station. They are heavily rooted and will produce a few berries the first year. Don't miss including a few in your garden planting this year.

Taylor

Famous For Vigor-Quality

Better because 75 years of accumulated knowledge goes into the production of strong, heavy rooted stock that we believe to be the finest available. Grapes are a specialty with us. We devote more than 15 acres to commercial Grape production with more than 100 varieties in our test vineyard. From this large list we have selected only the best for home gardens and commercial plantings. Every variety listed has some special merit. We have Grapes for short growing seasons such as Ontario, Grapes that require no spraying for fungus diseases such as Steuben, Buffalo, and Ontario. Also all of the time-tested varieties like Delaware and Concord. In short we have made it possible for everyone to grow good Grapes in the home garden. But to make your success doubly sure we include with every order complete information on Grape growing from planting to harvest. Written in simple language and illustrated in pictures that anyone can understand.

NEW SCHUYLER GRAPE

An entirely new type blue Grape. Originated very recently at the N. Y. State Experiment Station. A cross of California Zinfandel Grape with the fine variety Ontario. Clusters are large with berries larger than Concord. A beautiful light blue bloom covers them, making them most attractive. The berries are solid and meaty, sweet throughout, with a delicate vinous flavor. One of the heaviest producing varieties we have ever tested. Vines in our vineyard not yet three years of age produced 5-6 pounds of Grapes. It is so productive that it must be pruned carefully to prevent overbearing. Fruit matures early. The first year of fruiting (1949) the berries started coloring in late July and were fully ripe by late August. Vine is hardy as Delaware. **$1.25 each; 3 for $3.50; 10 for $10.00.**

VERY EARLY GRAPES
(August 20-27)

ONTARIO. New, early white Grape. Free from disease, requires no spraying. Clusters large, loosely formed. Berries above average, light yellow with a pleasing sweet and distinctive flavor. A perfect variety for home garden. **2-yr., 75c each; 3 for $1.95; 10 for $5.45; 100 for $24.95.**

VAN BUREN. New. This is the Grape to plant where growing seasons are short and winters severe. It has produced good crops of fruit after 30 below zero. Growth does not start until late in the spring so it seldom is injured by spring frosts. Ripens about September 1st or three to four weeks before Concord. Clusters are large, compact, well formed, beautiful deep purple. Medium sized berries are sweet and have a fine flavor. Makes fine jellies and juice because it is of the Concord type with a pronounced Grape flavor. Vine is vigorous and grows well even on poor soil. **2-yr. vines, 85c each; 3 for $2.40; 10 for $7.00.**

SENECA. This new California, European type white Grape represents a great achievement in modern plant breeding. Fruit is firm, crisp, delicately flavored and may be eaten with skin as California Grapes. The vine is as hardy as our native Grapes. Will keep to December if picked and stored in a cool place. **2-yr., No. 1, 90c each; 3 for $2.40; 10 for $7.50. Write for Special Prices on Larger Quantities.**

The Extra Sweet Buffalo Grape

EARLY GRAPES (September 1-10)

BRIGHTON. A sweet, highly flavored red Grape of excellent quality. Clusters are large, berries medium. Very vigorous, hardy, productive. Needs other varieties planted with it because of self-sterility. We recommend Brighton and Delaware as about the best of the red Grapes.

Prices: Brighton, Worden, Fredonia, 2-yr., No. 1 vines, 75c each; any 3 for $1.95; 10 for $5.45; 100 for $24.50.

WORDEN. A showy blue Grape of exceptional quality. Fruit is very sweet, juicy, highly flavored. Clusters and berries large. Very hardy, productive. Needs close pruning. One of the best blue Grapes for the home.

FREDONIA. Large, compact clusters and large berries covered with a beautiful blue bloom. Very productive, hardy, vigorous. Quality good.

BUFFALO. Originated by the N. Y. State Experiment Station. Buffalo is our finest flavored early blue Grape. It has a delicious flavor that defies description. Juicy, sweet, with melting, tender flesh and delightful aroma. Not only is the quality of the best, but the vine is a heavy and regular bearer. Clusters and berries are large, loosely formed, and covered with a delicate blue bloom. A very vigorous grower, hardy, and free from disease. We have grown it to perfection without spraying in our test vineyard. Makes fine Grape juice and jellies.

PRICES—Buffalo

Select, 2-yr. vines: 95c each; 3 for $2.55; 10 for $7.95; 25 for $14.25; 50 for $23.00.

Plant Miller's GRAPES

SPECIAL NEW VARIETY OFFER

1 Steuben 1 Interlaken Seedless
1 Alden
All three for
Only $4.65

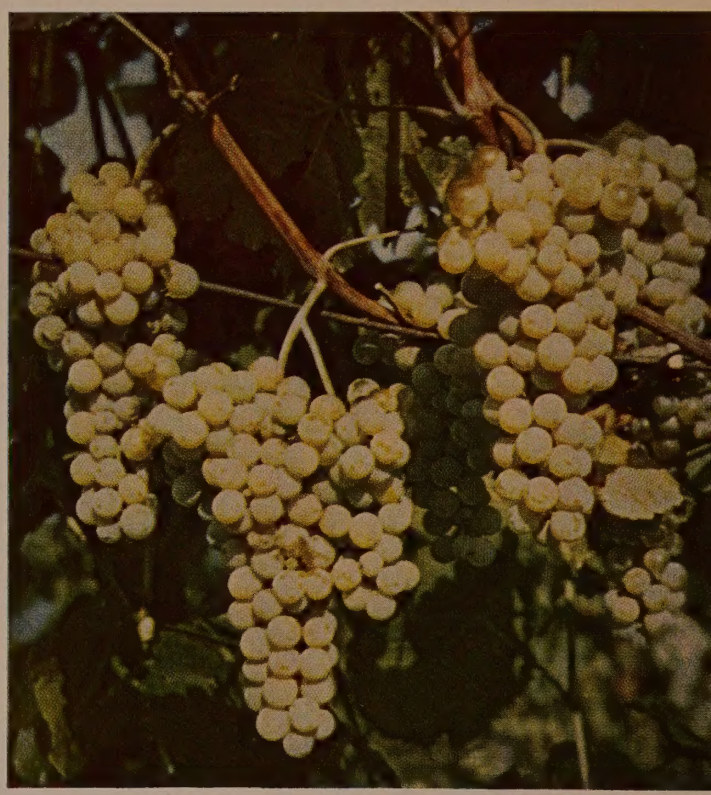
NEW STEUBEN

A New Creation of the New York State Experimental Station

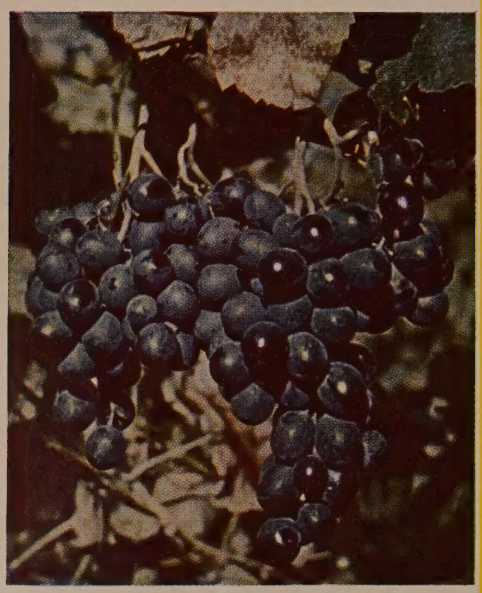
Never before have we grown a Grape of such exquisite flavor. Melting, tender, sweet with a delicate perfume-like flavor. Grows huge, perfectly formed, long, slender clusters. Not only is the friut of outstanding quality, but the vine is very hardy. Produced a full crop after 20 below zero. No spraying necessary. It is absolutely free from rot and mildew in our planting. Ripens a few days before Concord, but keeps well until Christmas. One of the best blue Grapes. We were the first nursery in the U. S. to list this superb variety. **Select, 2-yr., No. 1 vines, each $1.50; 3 for $3.95; 10 for $11.50; 50 for $35.00; 100 for $65.00.**

New INTERLAKEN SEEDLESS

Reserve a special place in your garden for this delicious new seedless Grape. Here's why. Now you can grow right in your own garden luscious seedless Grapes that are better than anything sold in stores. The plant breeders at the N. Y. State Experiment Station crossed the California Thompson Seedless with our own Ontario and hit the jackpot. Clusters and berries are medium size but the quality is beyond description, and even better than the famous California Thompson Seedless. The amber colored berries are crisp, solid, sweet throughout, but can be eaten whole like California Grapes with no seeds to bother. The fruit has a delightful vinous aroma with a refreshing tangy flavor. Here's more good news. It ripens the earliest of any of the 100 odd varieties growing in our test vineyards. It is fully ripe here by August 15. The vine has been hardy to 15 degrees below zero and is vigorous and free from disease. **Prices: Select vines, $1.50 each; 3 for $4.20; 6 for $8.10.**



Interlaken in Our Vineyard in August



Alden in Our Vineyard in September

ALDEN GRAPE

Alden is so good it defies description. Delicious is not the word to tell the true story—it's more than delicious, it's super-delicious. The oval, blue berries are as big as Damson Plums, many over an inch long. They are solid and crisp, juicy, sweet throughout, with a texture identical to California or European type Grapes, but better in quality because it has the distinctive, delicate flavor and aroma of our native Grapes. Alden is truly a true California Grape growing on a hardy native vine. Clusters are long and loosely formed and weigh up to 1½ lbs. Growth habits are about perfect. It is vigorous, free from disease and very productive. It is so productive that it must be pruned to short canes to prevent overbearing. We have recorded more than 25 lbs. of fruit from one vine but for best quality 15 to 20 lbs. is about right. Best of all, the vines are very hardy and will produce big crops year after year, even after sub-zero temperatures. We would say it is hardy to 15 or 20 below zero. Fruit ripens in our vineyard about Sept. 20-25th, or a few days before Concord. Keeps in good condition for a long time. Credit the able plant breeders at the New York State Experiment Station with another smashing triumph in originating this new super Grape. Miller's are first again in listing Alden. As far as we know it is not yet available from any other nursery. Our supply is very limited. Order early. **Prices: 2-yr., No. 1, selected vines, $1.95 each; 3 for $5.55; 6 for $9.95; 10 for $15.00.**

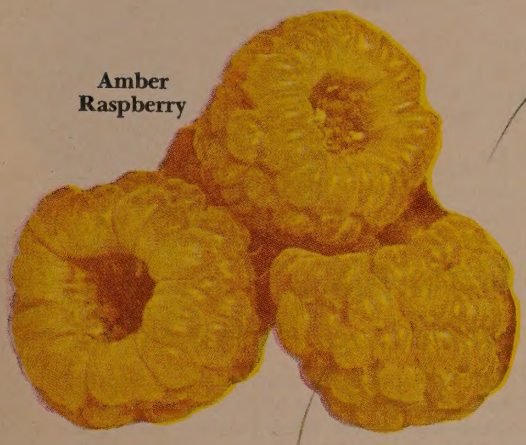
Miller's RASPBERRIES

BEST NEW and OUTSTANDING KINDS

BRISTOL *One of the Best in Black Raspberries*

The best of any of the new varieties. Berries large, glossy, firm, attractive, and of excellent quality. Our planting has been free from disease and very productive. In our test planting Cumberland, Bristol, and Morrison are growing in rows next to each other. Bristol outyields them all, almost 2 to 1. Quality is just as good and the plants are more upright and easier to pick. **Prices No. 1 plants, postpaid: 10 for $2.75; 25 for $4.95; 50 for $8.50; 100 for $14.95; 250 for $30.95.**

Bristol Black Raspberry



Amber Raspberry

New AMBER GOLDEN RASPBERRY

Highly Flavored—Delightfully Different

Here is the finest quality Raspberry in existence today. Fruit experts agree that no other variety can equal Amber for flavor, sweetness and all around good quality. The berries are uniformly large, maintaining their size throughout the ripening season with no crumbling. This fine variety was originated at the N. Y. State Experiment Station, at Geneva, N. Y. The berry is large and equal in size to the largest Raspberries. The shape is long and tapering, amber colored, juicy, tender, melting, sweet and highly flavored. The plants grow unusually tall, vigorous and upright. They are very hardy, productive and easy to grow in any good soil. If you want extra special quality plant Amber.

No. 1 PLANTS

6 for	$1.95	25 for	$ 7.00
12 for	3.75	50 for	13.50

New Durham A 2 Crop Berry

New DURHAM EVERBEARER

12 for $3.75; 25 for $7.00; 50 for $13.50; 100 for $24.95.

The University of N. H. originated this fine new berry to fill the need for a hardy, very productive, two crop berry that would ripen the fall crop before fall frosts occur. Durham is one of the finest berries in this respect. It is very hardy, the plants are more vigorous than any other berry, grows rapidly and starts producing right away. The fruit is large, firm, and highly flavored with attractive red color. First berries ripen July 1st and the fall crop in early September.

Here's a new wrinkle if you prefer a tremendous fall crop. In November after the plants are dormant, cut all growth off to within 2-3 inches of the ground. This eliminates most of the work in Raspberry growing, such as pruning, trimming, and all fungus disease that might be carried over in the canes. In the spring your plants will make a tremendous growth and all of the vigor and vitality goes into producing a bumper fall crop. This crop is borne on the tips of the new canes in large clusters, making picking an easy operation. Another advantage is that as with most all everbearers, the fall crop is much better in quality and sells for a much higher price. Your fall crop will start ripening about August 20th under this system and continue through October. Don't miss planting a few Durham this year.

Red Rich EVERBEARING STRAWBERRY

(Plant Patent No. 993)

The new wonder everbearing Strawberry. Unsurpassed for freezing. RED RICH is a deep red clear through. It possesses an abundance of natural sugar—less of yours for preparation. Solid and firm, RED RICH holds its natural eye appealing qualities when thawed—it won't mush up. Too, it makes a better dessert or preserves because it is big, red, and sweet.

Even in its earlier development a one acre planting of RED RICH yielded 4000 quarts the same season it was planted. And in a second year RED RICH produced a June crop in matted rows from June 6 to July 6, like a June bearer, and then came through with a heavy yield in August, September and October to more than double the first year's crop. The crown and root system are exceptionally large as well as the leaves. It is a rugged, disease resistant plant that will produce outstanding yields.

PRICES RED RICH

12 plants	$2.95	50 plants ..	$ 8.50
25 plants	5.00	100 plants ..	15.00
250 plants	$32.50		

Guaranteed arrival in good condition—Guaranteed to grow. All RED RICH plants are shipped direct from the patent holder.

THE LEADING BLACKBERRY

BAILEY Improved Blackberry

A delicious new Blackberry we think is best of all Blackberries. Berries are large, firm, coreless, sub-acid with a true pleasing Blackberry flavor. Sugar and acid are perfectly balanced to make it a real taste treat. Fruit ripens about July 1st to 15th. Plants are vigorous, productive and hardy. This variety was selected as having great promise both for home use and commercial plantings. Originated at the New York State Experiment Station. Plant a few this year. The abundance of berries produced will pay for the plants many times over.

Prices: No. 1 plants, 6 for $1.95; 12 for $3.75; 25 for $7.25; 50 for $13.50; 100 for $24.95.

NEW PURPLE AUTUMN *A New Purple Everbearing Raspberry*

Purple Autumn Raspberry

This sensational plant discovery from the Illinois Experiment Station marks another first in development of new, outstanding fruits. It is the first everbearing purple berry ever to be named. Now you can enjoy fruit of exquisite flavor from July to November. Here is why Purple Autumn will be a most valuable addition to your garden. The berries are larger than any other variety. Fruits are firm, attractively colored, delightfully sweet and highly flavored. The first crop ripens about July 1st and lasts three to four weeks. The fall crop ripens about September 10th and continues until frost. In the latitude of southern Pennsylvania the fruit would ripen about two weeks earlier. Plants are hardy, vigorous, free from disease and easy to grow. Purple Autumn is the ideal berry for the home garden because a few plants will produce an abundance of fruit in small space.

Prices: 6 for $1.95; 12 for $3.85; 25 for $7.25; 50 for $13.75; 100 for $24.95.

Cut Your Own Garden Fresh

ASPARAGUS *Every Year!*

One of the most beautiful of all vegetables. Rich in minerals and vitamins. Easy to grow. Once established produces annual crops for years. Makes a delicious frozen product.

MARY WASHINGTON

The best variety at the present time. Rust-resistant, strong grower, extra large size stalk, rich and tender, fresh green color. Rated as excellent for quick freezing.

Asparagus roots, 2-yr., No. 1, 25 for $2.25; 50 for $3.75; 100 for $6.00; (500 for $18.75, not prepaid).

New CANADA RED RHUBARB

New delicious red Rhubarb. Tops them all in quality, appearance and flavor. Also a better grower. Stalks can be cut a year sooner than with the old style green-stalked varieties. Sweeter, requires less sugar than the common Rhubarb. The deep red skin and white flesh, combined with a pleasing flavor, makes the best pies and sauces you ever ate. **90c each; 3 for $2.60; 10 for $6.95.**

BLUEBERRIES

BEST CULTIVATED VARIETIES FOR HOME USE

1. Fruit 5 Times as Large as Wild Varieties.
2. Bear Early, Usually the 2nd Year.
3. Bears Big Crops, up to 6 Qts. per Bush When Full Grown.
4. Once Planted—Lasts a Lifetime.

Concord Blueberries

CONCORD. Early to midsesaon. Plants tall, vigorous, upright. Fruits large, light blue, attractive and of the best qnality. Borne in clusters resembling those of Concord Grapes.

STANLEY. New superior variety now considered the best in its season of ripening by both home and commercial growers. Tall vigorous plants, very productive, fruit large, perfumed and most delicious in flavor.

JERSEY. Late. Bush grows tall, well shaped, vigorous and productive. Fruit is large, attractive, firm, quality best. We suggest planting at least one plant of each variety to insure a supply of fruit over a long season and for proper pollination.

BLUEBERRY PRICES—GUARANTEED TO GROW STOCK

3-yr., 12-18 in., $1.40 each; 3 for $3.30; 10 for $9.95; 100 for $70.00. 3-yr., 18-24 in., $1.75 each; 3 for $4.50; 10 for $13.95; 100 for $95.00, not prepaid in 100 quantities.

TWO NEW BLUEBERRIES

These outstanding new varieties from the U. S. Dept. of Agriculture are well worth trying. In many ways they are superior to the older kinds having extra large berries of exceptionally fine flavor. The plants grow vigorously and have been free from disease.

NEW BLUERAY. One of the earliest ripening of all. Berries are large, a beautiful light blue with a distinctive pleasing flavor. Grows vigorously and is hardy and free from disease.

NEW BERKLEY. Grows the largest berry of all and ripens about a week after Blueray. The large, light blue, attractive berries are exceptionally fine flavored, firm, and produced in great clusters. A vigorous growing, hardy, productive plant.

Prices: 3-yr., 12-18 in., $1.75 each; 3 for $4.65; 10 for $13.95. 3-yr., 18-24 in., $1.95 each; 3 for $5.40; 10 for $15.95.

Special Blueberry Collection

One Each of Five Varieties
1 Concord 1 Stanley
1 New Blueray 1 Jersey
1 New Berkley

5 3-yr., 12-18 in. plants

You save $1.00 over each price. **$6.70**

New COLETTE Everbearing PEAR (Patent No. 1401)

A New Addition to the Pear Family. Colette Pear bears fruit of such superb quaiity that even without the unusual bearing habit it would be worthy of a place in every garden. The first fruits are about the size of a Bartlett with rich, waxy color with pink cheeks. First fruit ripens about August 25th and is followed by a continuous succession of fruit until the fall freezes catch the remaining unripened fruit.

RICH FLAVOR—FIRM FLESH. The rich aromatic, spicy flavor and the fine, firm, white flesh, entirely free of grit, give this Pear eating quality without equal. Fruit is firm with a delightful fragrance. Eating quality is as good as any Pear grown. Canned Colette Pears have a rich aromatic flavor that is superior to any other Pear.

Tree grows broad, short and shapely. Very hardy and a fine tree for the home garden. Enjoy Pears from August until November. Plant Colette. **Prices: 4 to 5 ft. trees, $3.25 each; 2 for $6.25.**

DWARF ORANGE QUINCE

Makes Fine Jelly—Delicious Sauce

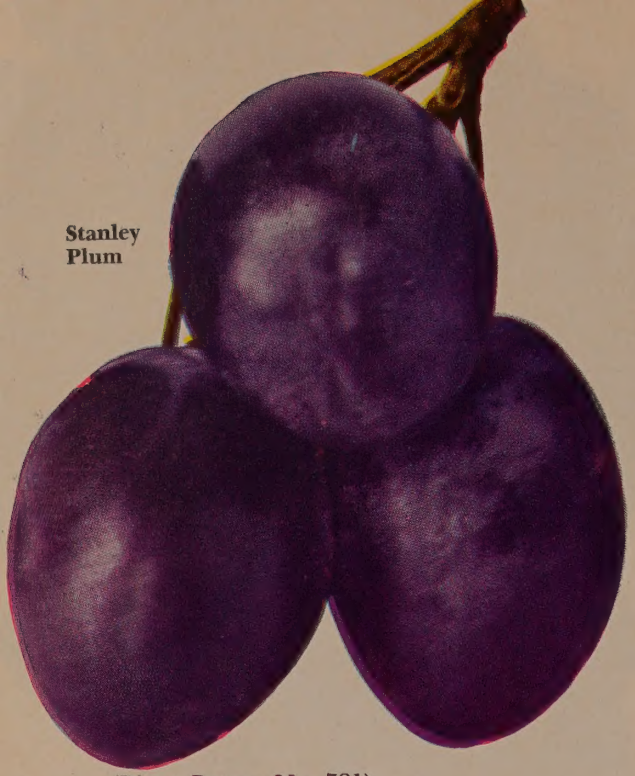
The best variety available today. Fruit large, golden yellow. Bears abundantly every year. Because of its dwarfing characteristics, it requires only a small space. May be grown either as a tree or in bush form. Its unusual large white blossoms increase its value as a distinctive ornamental specimen.

2-yr., 4-5 ft.

$3.25 Each 2 for $6.25

Miller's Sweet,

Enjoy These Outstanding Fruits of High Merit!



Stanley Plum

Shiro Plum

(Plant Patent No. 721)

HOWARD MIRACLE PLUM

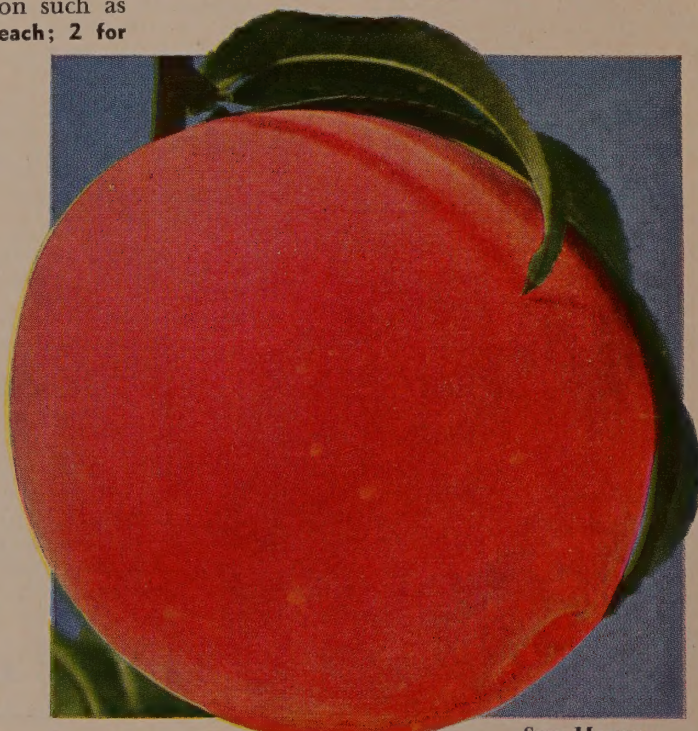
A New Improved Variety That Bears Abundantly

The "Beau Brummel" of fine Plums. Huge size, exquisite flavor, beautiful color. This new Miracle Plum marks a new era in the development of fine fruit on a tree that is very ornamental. It has beautiful white blossoms in spring and vividly colored fall foliage. It grows rapidly and bears early. Hardy to 18 below zero.

DELICIOUS AND APPETIZING FLAVOR. All the delicious flavors of Peach, Plum, and Nectarine seem to be combined, to make this the most delightful flavored Plum of any grown. Huge fruits have amber flesh with skin so thin that it is practically unnoticeable when eaten. Perfect blending of the sugars and esters make this the most delicious Plum with the most unique pleasing flavor of any. Keeps well, delicious in preserves, fruit ripens over a long period during July and August. Beautiful ornamental tree of medium size, richly colored leaves in the fall like the leaves of a Maple. No other Plum can compare with Miracle Plum in quality. Grow it, taste it yourself, we know you will agree that this is the outstanding Plum of the century.

To insure heavier fruiting plant another variety for pollenation such as Santa Rosa or Burbank. Supply limited. **3 to 4 ft. trees, $2.75 each; 2 for $5.00.**

The Exceptional Howard Miracle Plum



Sun Haven

Juicy PLUMS — Best Varieties for Home and Orchard

PRICES—PLUM—PRUNE TREES, 2-Yr., 4-5 Ft.
$2.25 each; 3 for $6.45; 10 for $19.95

BURBANK (Japanese). Fruit large, dark red. Skin thin, covered with heavy bloom. Flesh yellow, juicy, tender and sweet. Tree large, spreading, productive. Ripens late August.

STANLEY. Fruit large, Prune shaped, bluish purple, very attractive. Flesh yellow, juicy, sweet, richly flavored. Tree large, spreading, productive. Bears young. We like Stanley and Fellemberg the best of all Prunes for home and commercial use. Ripens early September.

SANTA ROSA. Large, very juicy, dark reddish purple. The melting red flesh has a fine texture and delightful flavor. One of the best Japanese Plums. Trees are large, rapid growing and bear early. Ripens mid to late August.

FELLEMBERG. Fruit large, oval, purple. Flesh yellow, firm, sweet, fine grained and tender. Tree very productive, spreading, hardy. A delicious Prune for eating out of hand, canning and preserves. Ripens early to middle September.

SHIRO. The Golden Plum Everyone Loves to See and Eat. A Golden Yellow Winner. A very early Plum. Beautiful golden yellow variety. Tree is low growing, hardy, very prolific. Excellent for cooking, canning and dessert use. People who like Plums should be sure to plant this variety. Ripens August 8-15. Japanese type; plant another Jap Plum for pollination.

PLUM TREE POLLINATION

Japanese Plums, Burbank and Santa Rosa, are self-sterile and need other kinds planted with them in order to produce fruit. Fellemberg and Stanley are European Plums and self-fertile (one tree planted alone will produce fruit). Plant more than one of the Japanese varieties for proper pollination.

SEE HOWARD MIRACLE PLUM, Lower Left

NEW MAX-RED BARTLETT PEAR

(Plant Patent No. 741)

Everyone likes the well known Bartlett for its fine flavor and high quality. Max-Red is even better. It contains 10% more sugar by actual test and still retains all of the delicious flavor of Bartlett. This new Pear was discovered as a bud sport growing on a Bartlett tree. A bud sport is where a distinctly different fruit is produced on one branch of a named variety, in this case Bartlett. Max-Red with its bright red color is much more attractive than Bartlett. The added 10% more sugar combined with the delicious Bartlett flavor make it an outstanding new Pear. The tree grows rapidly and with us has started fruiting the third year after planting. Plant another variety with it for pollination. Either dwarf or standard Clapp's Favorite is an excellent pollinator. Winter hardy to 20 below zero. **2-yr., 4-5 ft. branched trees, $2.95 each; 2 for $5.75.**

Pick Tree Ripened Fruit From Your Own Trees

HARDY DELICIOUS NECTARINES

Standard Size Trees

Nectarines have a delicious flavor very much like a Peach. Fruit is smooth skinned like a Plum, but resembles Peach in shape and size. Leaves and growth habits are the same as a Peach and require the same culture and care.

Nectacrest Nectarine

NEW NECTACREST. Nectarines are one of our most delicious fruits but New Nectacrest developed at the New Jersey Experiment Station is by far the best of any. It has the sweetest, finest flavor of any we have tasted, combining all of the best flavors of a Peach. Medium to large size fruits are most attractive with bright red cheeks shading to pink. The white flesh comes free from the pit and has a fine texture with the most delightful flavor blends. Tree is hardy and vigorous and as easy to grow as a Peach. Hardy to 10-15 below zero. Self-fertile, one tree will produce abundantly. Standard trees grow to about 12 feet, dwarf to 6-7 feet. Ripens September 1st to 10th. Enjoy a new adventure in fine eating. Plant new Nectacrest. **Prices: 4-5 ft., $2.50 each; 2 for $4.75.**

FOR DWARF NECTARINE—See page 16.

Choice PEACH TREES

PEACH PRICES
4 to 5 ft. trees, each $1.95;
3 for $5.70; 10 for $16.00.

New Sun Haven Peach

40 Days Earlier Than Elberta

Almost everyone waits with keen anticipation for the ripening of the first Peaches of the season. Now we won't have to wait so long. New Sun Haven ripens 40 days before Elberta. Besides being extra early it is a fine eating Peach with a delightful rich flavor. Fruits are medium to large, bright red with yellow-gold cheek. Flesh is clear yellow and resistant to browning. The trees are large, vigorous, productive, and very hardy. No injury to the tree occurred after 19 below zero but fruit buds were damaged. Still one of the hardiest of all Peaches. Originated and introduced by Michigan State College in 1955 as one of the best of thousands of seedlings. Be the first to have ripe Peaches. Plant delicious, hardy Sun Haven.

RED HAVEN. A new, early, freestone, yellow fleshed Peach introduced by the South Haven Experiment Station, Michigan. Almost free from fuzz, medium sized, noted for its all-over bright red color with delicious flavor of Hale-Haven and South Haven. Hangs on tree better than other Peaches even when fully ripe.

GOLDEN JUBILEE. New, large, yellow freestone. Ripens from middle to late August. Flesh tender, fine grained, juicy, and excellent quality. The best early yellow Peach. Excellent for canning and home use. Tree productive, hardy.

NEW RICHAVEN. Another extra fine Peach originated at Michigan State College. A cross of Hale-Haven, Red Haven and J. H. Hale—combining the better qualities of each. Ripens 18 days before Elberta, 3 days before Hale-Haven. The most attractive fruits are nearly round, bright golden, overlaid with a bright red blush. Flesh is clear yellow, of delicious melting texture and resists browning. Entirely freestone. Trees grow large and are vigorous and extremely hardy. Withstood 19 below zero with no permanent injury to the tree. This excellent new variety is perfectly adapted for either home or orchard planting.

HALE-HAVEN. New. Fruit is large, yellow with red cheek, freestone. Flesh firm, juicy, very sweet, and richly flavored. Ripens September 1st to 5th. Tree is very productive, hardy. One of the best canning Peaches of all.

ELBERTA. Best known yellow canning Peach. Freestone. Fruit large, attractive, good in quality. Ripens early September. Tree hardy, productive.

ALL PEACHES WE LIST ARE SELF-FERTILE—NO POLLINATORS REQUIRED

PEAR TREES

Delicious—Easy To Grow—Best for Home Grounds

STANDARD PEARS

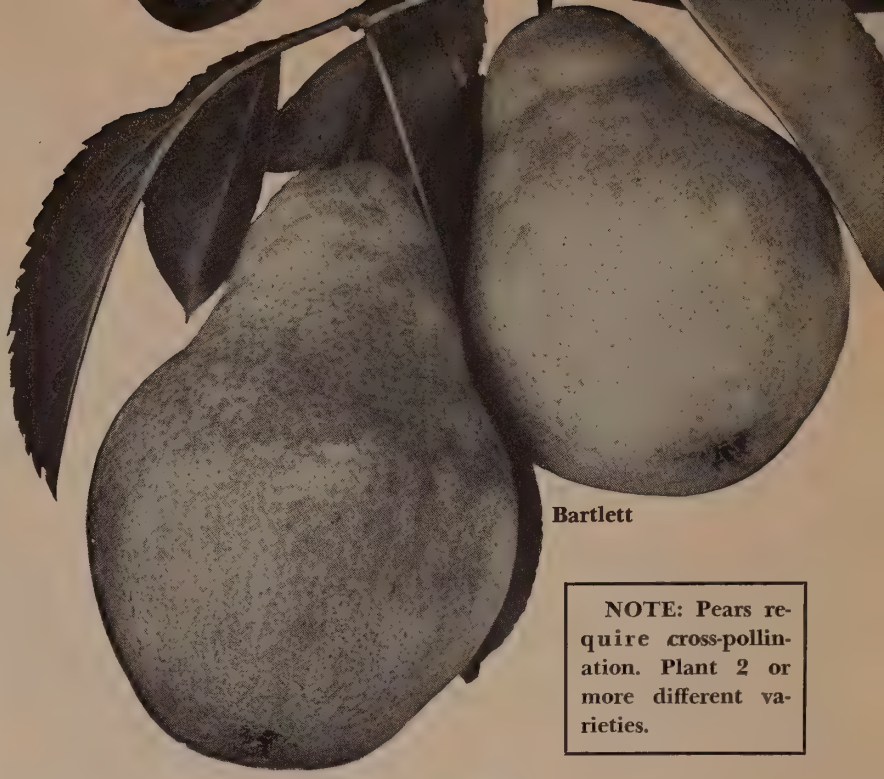
CLAPP'S FAVORITE. Large yellow Pear with red cheek. Flesh juicy, fine texture, sweet with fine flavor. Tree is hardy and productive. Ripens middle to late August.

BARTLETT. Fruit large, yellow, juicy, highly flavored. Unexcelled for canning. Tree vigorous and very productive. Ripens late August.

SECKEL. Fruit small. Best quality of all Pears. Exceptionally sweet, juicy, delicately flavored. Coppery red to golden brown. Tree is rather a slow grower but very hardy and productive. Ripens September 1st.

BEURRE BOSC. A large gourd-shaped Pear, russet-bronze in color. Quality of the best, sweet, rich, fine grained, with fine flavor. One of the best long keeping varieties. Tree hardy, productive. Ripens late September.

2-yr., 4-5 ft., well branched trees with fine roots, $2.25 each; 3 for $6.45; 10 for $19.95.



Bartlett

NOTE: Pears require cross-pollination. Plant 2 or more different varieties.

Sparkle
The Best Strawberry for Freezing

STRAWBERRIES

CATSKILL. Berries large, firm, glossy, dark red, quality equal to the best. Plants thrifty, vigorous. Ripens a few days after Premier. One of the best newer varieties of proven merit. Fine for freezing.

FAIRFAX (Early). A very large high quality berry. Sweetest of any variety. One of the best for freezing—rating on a par with Sparkle. Strictly a home garden berry but if you want the best for home use, and a real treat, plant Fairfax.

NEW EMPIRE. A superior midseason to late berry originated at New York State Experiment Station. Berries are huge, one customer writes that his Empire Strawberries were more than two inches in diameter. Besides being extra large they ripen over the longest season of any Strawberry other than everbearing. One of the best for home planting because of huge size, good quality and long fruiting season.

PREMIER. No variety ever introduced has received so much praise or been so widely grown. Adaptability, quality, flavor and frost-resistance are Premier features. One of the best for home garden or commercial planting.

IMPORTANT: Please Note. All Strawberry plants are shipped separately. If you order other stock besides Strawberries you will receive two shipments. We cannot always make shipments on the same day. Weather conditions may prevent our shipping Strawberries the same day we ship other stock.

NEW SUPERFECTION EVERBEARER

New, large, glistening deep red all the way through. In all tests has been a heavy producer of fine quality fruit. Fine for table use and freezing. Healthy, thrifty plants are large, free from disease. One of the latest and best introductions. Berries start forming 90 days after planting. Also produces a large June crop the following year.

25 plants $2.50 50 plants $4.50 100 plants $7.00
250 plants $14.00 500 plants $21.90

SPARKLE (Late). Introduced by the N. J. Experiment Station and has proven to be the best late berry for the Northern States. Bears tremendous crops of large brilliant red berries that are firm, with a delicious flavor. A vigorous grower and plant maker. Free from disease. Ripens after Premier. For home use and commercial planting. One of the best for freezing.

VIRUS FREE Get bigger yields. Plant virus free plants. Tests indicate that a planting made with virus free plants will yield a great deal more fruit. The planting will last longer and produce better quality fruit. All of our plants are spring dug from certified virus free plot.

—GUARANTEED TO GROW STOCK—

HOW TO ORDER MILLER'S GUARANTEED STOCK

(Please Read Carefully)

PREPAID SHIPMENTS

We pay shipping charges except to Oregon, Washington, California, Arizona and Canada. Include 10% extra if you live in these states. To cover red tape in processing Canadian orders we require 40% extra. We cannot ship nut trees to California or Arizona; Grape vines to Washington and Arizona. Plum, Peach, Nectarine or Almond to Washington, California, Arizona and Idaho.

MILLER'S GUARANTEE

We guarantee our stock to be first class in every respect and will gladly refund purchase price in full if you are not satisfied in every way.

We guarantee all of the nursery stock sold by us to be true-to-name and will replace free of charge any plant or tree that proves otherwise. At no time will we be responsible for any sum greater than paid for the stock.

FREE REPLACEMENTS

We will replace free of charge any plant that fails to grow. This guarantee covers one growing season. We must be notified of any losses by September 15th on spring planted stock, and May 1st for fall planted stock.

WHEN NOTIFYING US ON REPLACEMENTS PLEASE INCLUDE 50c TO HELP PAY HANDLING AND POSTAGE.

PLEASE NOTE: We cannot be responsible for more than the current growing season because of hazards and extremes in weather over which we have no control.

SHIPPING SEASONS

SPRING—Usually starting late February to June 1.
FALL—From October 20th to mid-December.

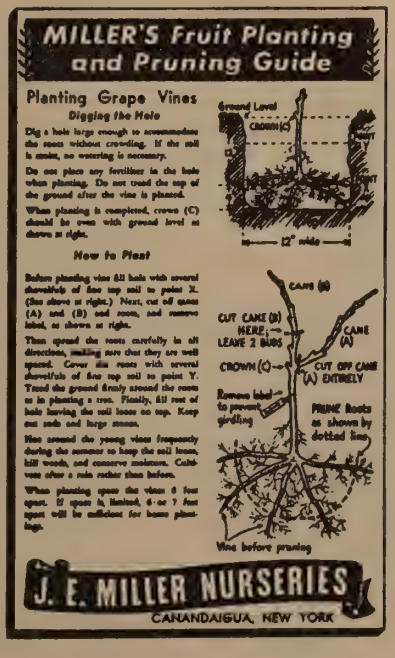
ABOUT THE MILLERS (Reading time 1 minute)

Germany 1860's. Grandfather Miller completes service in Prussian War. Another War in offing. That's not for him. So to the U. S. and a new life. Pioneer Grape and fruit grower on Canandaigua Lake's fruitful shores . . . Dad Miller 1872-1946. A fruit man who really had it. Thorough, intelligent, a lifetime devoted to fruit culture. The Miller boys learn fruit growing from an expert. 1936, Ed (that's me, J. E.) has an idea that folks would like some of our delicious new Grapes at home. Small nursery established to sell fruit stock by mail. 1940, Brother George joined the growing firm. We expand our line, offering a complete line of fruit stock. 1945, we acquire another 86-acre farm on Canandaigua Lake's sunny slopes. Built a new, modern office and storage. Today—still not a large nursery by present standards, but well equipped to supply the best and give you a square deal.



BUY FROM THE GROWER

We are growers of high quality nursery stock. We take great pride in the plants we grow and sell. The climate here in the Finger Lakes Region is ideal for producing superior fruit stock. Miller's stock is grown right, packed right, and shipped to arrive nursery-fresh. We have so much confidence in our stock and our customer's honesty that we guarantee it to grow or replace it free. Buy from the grower and save. You will get a square deal and the best stock money can buy.

MILLER'S FRUIT PLANTING AND PRUNING GUIDE FREE WITH EACH ORDER

Another free service to our customers to insure your success. You want top-quality fruit in the shortest possible time. We want satisfied customers. That is why we spent a great deal of time and money in preparing our Planting and Cultural guide. Pictures tell a story better than words. We explain by illustrations and simple language how to care for plants from planting to harvest. What we have learned in 75 years accumulated experience in fruit culture we pass on to you in a form that will guarantee a full measure of success.

It is so easy and simple. Hundreds of our customers write telling us how much they appreciate the simple but invaluable information we supply. Many write of their success in fruit culture through following our cultural instructions and send photographs to prove it.

Black Walnut	3 to 4 years	40 x 50 ft.
English Walnut	5 to 6 years	35 x 35 ft.

WHAT IS THE BEST FERTILIZER

We firmly believe that there is no substitute for fertilizers of an organic nature, such as old hay or straw, compost, well rotted manure, decayed leaves. Any of these materials help loosen the soil, add organic matter and make the soil more retentive of moisture. Also growing plants under a mulch keeps the soil at a more constant, favorable temperature for plant growth.

What's BEST in DWARF APPLE TREES

HOW TO SELECT THE BEST TYPE DWARF TREE

We are specializing in dwarf fruit trees, especially dwarf Apple and can supply dwarf Apple on both true dwarf and semi-dwarfing stock. Our dwarf Apple trees are propagated by budding the desired variety on East Malling rootstock. Malling rootstocks are designated by Roman numerals from I through XVI.

SEMI-DWARF

We recommend Malling VII as one of the best for commercial and home plantings. It makes a tree only slightly larger than the one on Malling IX, the true dwarf, but has a much better root system and produces more fruit. It is well adapted to varying soil conditions. Ultimate height about 8-10 feet. One of the best for home and commercial plantings. Does not require staking.

TRUE DWARF

Malling IX is the true dwarf and makes a tree only 6-8 feet tall when full grown. It is a valuable tree for home planting where space is limited. It has a rather brittle root system and must be staked. Trees come into bearing very early. Often the year following planting. At the time of planting it is a good plan to place a permanent stake about two inches from the trunk and fasten the tree to the stake with some soft material that will not scar or girdle the trunk of the tree

SOME TIPS ON PLANTING

Plant as early in the spring as possible. Early planted stock will make almost twice as much growth the first year. Late October and early November is the best time to plant in the fall. We usually do not start shipping before October 20th so that our plants are fully matured before shipping.

It is possible to grow some fine stock on heavy soils but it is sometimes more difficult to get it started. If you have heavy clay discard it entirely and use good top soil around the roots and when filling the hole. Your plants will get off to a quick start and make a better growth.

DO NOT USE FERTILIZER IN THE HOLE WHEN PLANTING.

More stock is killed by using fertilizer near the roots than any other cause. Most chemical fertilizers are quite caustic and will kill roots of newly planted stock on contact. Fertilizers such as bone meal are non-burning and can be safely used in the hole when planting and usually contribute to increased growth. Make sure your newly planted stock has plenty of water, especially during the hot dry days of summer. Newly planted stock needs water more than any other thing. Tests have proven that plants that receive water during dry periods make about twice as much growth. During dry periods use a full pail of water per plant once each week. Let it soak in slowly.

NORTHERN SPY SEMI-DWARF APPLE

This tree is about 4 years old

This is David Miller, a senior in high school. Brother John is studying Horticulture at Cornell and will graduate in '62. Both boys are intensely interested in nursery work. At an early age they learned how to propagate by budding, how to prune, cultivate and handle plants. Now they will get more technical training.

GROW DWARF FRUIT TREES

Enjoy the pleasure of growing your own fruit on dwarf trees. You will find that home-grown, tree-ripened fruits are much sweeter with more flavor and better quality. Grow large tasty apples, juicy plums, delicious peaches, pears, cherries and nectarines.

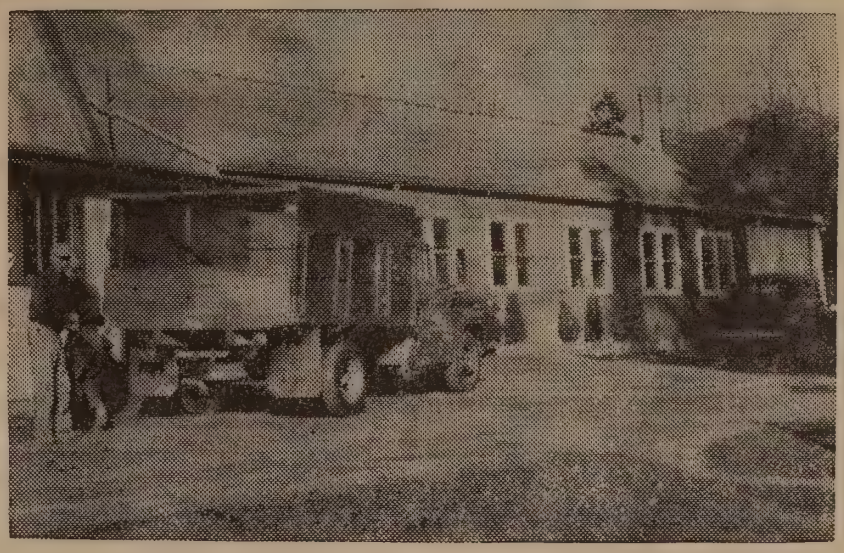
Dwarf Trees are easy to grow, require little space, bear young and produce full size fruit on small trees. They're ideal for the home garden.

Our Silver Anniversary

25 YEARS OF PROGRESS

First of all we want to thank our thousands of customers for making our growth possible. We are deeply grateful that your continued confidence in us has enabled us to grow steadily with the years. From a most humble beginning we feel we have come a long way.

Today we are proud to offer many new innovations such as new packing methods, efficient modern buildings thoroughly insulated so that we can pack and ship stock that will arrive in nursery fresh condition. Constant research to bring you new and better varieties. New improved growing methods for producing better stock, skilled nurserymen that know how to grow and handle plants. Top quality plants that are guaranteed for one season's growth and delivered free.



NEW STORAGE AND SHIPPING BUILDING

DOUBLE PROTECTION IN PACKING

Exhaustive research has proven that plants wrapped in new polyethylene paper will keep in good condition without drying out for 3-4 weeks. Just to make sure that not one bit of moisture is lost we pack damp spaghnum moss around the roots for double protection. Note how we fasten a sturdy piece of bamboo in the package to prevent breakage in transit. We believe it is this extreme care in packing plus our high quality plants is the reason why 98% of the plants we sell grow.

PACKING AND TYING FOR SHIPMENT

PROGRESS IN PACKAGING

Bob Carson demonstrates one of our new mechanical tying machines that we use for tying packages for shipment. These machines speed our packing operation and do as good or better job of tying than can be done by hand at a great saving in time. Bob has eight years' practical training with us plus technical training at Alfred University.

NEW HIMROD SEEDLESS GRAPE

This new seedless grape has large handsome clusters turning golden yellow when fully ripe. Clusters are loose, berries medium sized, entirely seedless, crispy sweet throughout with a fine flavor. Berries can be eaten just like California Seedless with no seeds to bother. We think they are much better flavored and sweeter than California Seedless. Fruit ripens late August or about a week later than Interlaken Seedless. This is a sister seedling of Interlaken Seedless and originated at the New York State Exp. Sta. It is hardier than Interlaken and not prone to winter injury. The vine is productive. Mature vine will yield 10-15 pounds of grapes per vine.

No. 1 Vines Each $1.95—3 for $5.55—6 for $9.95

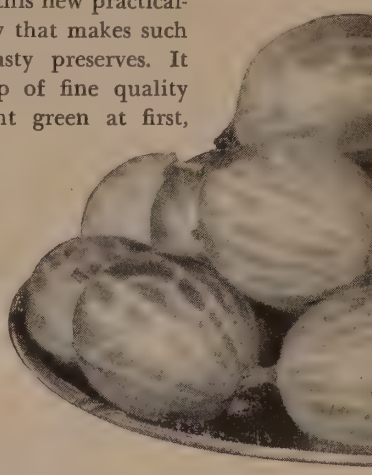
Garden Favorites

that Bear Quickly - Require Little Care!

CURRANTS

RED LAKE. A new variety with large, dark red berries on long well filled stems. Very hardy and productive. Bears over a long season, July 1st to 20th. **2-yr. bushes, 90c each; 3 for $2.45; 10 for $6.95.**

New PIXWELL GOOSEBERRY



You'll want to grow this new practically thornless Gooseberry that makes such delicious pies, and tasty preserves. It produces a heavy crop of fine quality berries. Attractive light green at first, they turn pink when fully ripe. It "picks well" because the fruit hangs on slender stems an inch below the branches where they can be quickly and easily picked. Very hardy, it does well on any average soil. Our two-year plants will bear the next year after planting. The colorful foliage makes it a very attractive ornamental plant as well as valuable producer of delicious fruits. **2-yr., No. 1 plants, $1.25 each; 2 for $2.25.**

IMPORTANT: When ordering Gooseberry or Currant plants, it is necessary to have the following information:

1. County and Township where planting is to be made.
2. Approximate distance from nearest stand of White Pine (Five-Needled Pine.)

If you do not receive the Currants and Gooseberries with your order, you will know we are holding them for the permit. If the permit is not granted, refund will be made.

Beach Plum Makes Delicious Preserves

Miller's BEACH PLUM Bushes

18 in to 24 in. Plants $1.95 each

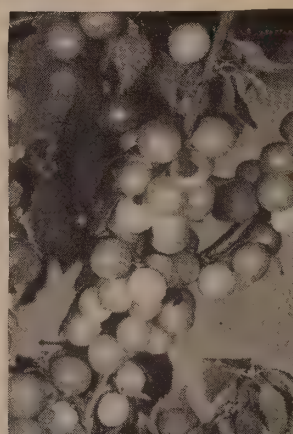
Beautiful white blossoms tightly cover the branches in the spring. These develop into colorful fruits that make delicious jams and jellies. Fruit may be bluish purple, red, or yellow and is ripe in September. It grows well on the poorest soil and is extremely hardy. Once established it will withstand prolonged droughts, sub-zero cold and most diseases. Can be grown as a shrub or a small tree by selective pruning. Usually starts bearing next year after planting.

NANKING CHERRY

(Prunus Tomentosa)

Every twig is covered with Cherry-like blossoms which are a shell-pink in bud opening to pure white. In early May before the leaves unfold the whole plant is a glistening mass of white flowers. These are followed by bright red Cherry-like fruits in tight clusters which add striking color and can be used to make tasty pies and jam. Very hardy. Will survive and produce after the coldest winters. A fine shrub with attractive, clean foliage. Plant two for proper pollination. Grows 8-10 feet tall.

18-24 in. plants, $1.65 each; 2 for $2.95.



Nanking Cherry

PLANT A HARDY AMUR RIVER PRIVET HEDGE

Makes a clean, trim looking hedge with clean, glossy green leaves and attractive, upright growth. Hardy even in the coldest locations and does not freeze back to the ground after cold winters like California Privet. Grows to about eight feet but can be pruned to any height desired. Grows well on almost any type soil and is almost evergreen, retaining its waxy green foliage almost all winter. **18-24 in., 25 for $5.95; 50 for $11.95; 100 for $21.95.**

NEW MORAINE LOCUST

(Plant Patent No. 836)

Beautiful vase-shaped in form. Very vigorous, fast growing tree, seedless, thornless. Absence of seed pods and the quick crumbling of the Moraine Locust leaves eliminates raking and piling leaves. The dark green, lacy foliage makes plenty of cool shade but allows enough sunlight to filter through so that grass grows well. It is not susceptible to disease and will grow well in spite of smoke. Does well on all kinds of soil. Its hard wood will not break under strains of wind and snow. For trouble free permanent beauty, plant this new outstanding tree. **5 to 6 ft. trees, $6.00 each.**

Moraine Locust

Large, Red Montmorency Sour Cherry

Miller's

CHERRIES

We Have the Very Best Oxheart Varieties *All Extra Selected!*

Strong Trees

The BEST PIE CHERRY

LARGE MONTMORENCY

The finest sour or pie Cherry. The fruit is extra fine in flavor and its brilliant red flesh is very appealing to the eye. A heavy annual bearer. As a superior variety for making those delicious pies and preserves plant Montmorency. Self-fruitful, requires no pollinator. **Prices: 2-yr., 4 to 5 ft., $2.25 each; 3 for $6.00; 10 for $18.50.**

SWEET CHERRIES

Cherries Grow Rapidly—Bear Young—Ornamental

Sweet Cherries should be planted as early in spring as possible. They will not survive late plantings if weather conditions are unfavorable.

IMPORTANT. Cross-pollination is essential with all Sweet Cherries. Always plant two or more kinds together to insure proper pollination.

BLACK TARTARIAN. A large, black meaty Cherry that is well known everywhere for its sweet flavored fruit. Tree vigorous and a heavy bearer. Ripens middle to late June.

NEW EMPEROR FRANCIS. This new Sweet Cherry is rapidly gaining recognition as a superior variety to many older White Oxhearts. It resembles Napoleon in size and color but fruit has darker, richer color and is more firm and meaty and the flavor is really outstanding. Ripens a few days to a week earlier than Napoleon.

PRICES ON SWEET CHERRIES Guaranteed to Grow

4 ft. to 5 ft. Trees, $2.45 each; 3 for $6.95; 10 for $22.50.

NAPOLEON. A beautiful yellow Cherry with a bright red cheek. Flesh is firm, juicy, very sweet and fine flavored. Bears heavily. An excellent canning variety. Tree is vigorous, well shaped. Recommended for commercial and home planting. White Oxheart type.

SCHMIDT'S BIGARREAU. An extra large Cherry with a deep, rich mahogany color. Flesh dark, fine grained, tender, with a pleasing sweet flavor. Fruit grows in clusters. Tree vigorous, very productive. Ripens in July.

WINDSOR. One of the best quality dark Cherries. Large, juicy and firm, one of the best, if not the best, for canning and eating out of hand. Tree is rapid and upright grower. Ripens July 15th-20th.

The Best in Fine APPLES

Miller's Selected Apples - Listed in Order of Ripening

RED ASTRACHAN. A tarty red Apple. Excellent for pies and cooking. Ripens mid-August. Trees bear young. One of the best early sorts.

YELLOW TRANSPARENT. Tree grows upright, hardy, early bearer. Fruit good size. Skin clear, white to pale yellow in color. Flavor very good. Early August.

LODI. New yellow Apple with larger fruits and better quality than Yellow Transparent. Ripens about August 10-15th. It has fine quality for an early Apple and the tree is very vigorous. A heavy bearer and hardy.

McINTOSH. Tree vigorous, bears young and is very hardy. Quality of the best. Delicious aromatic flavor, beautiful, large, bright red Apple. Ripens September.

R. I. GREENING. Noted for its fine cooking qualities. Flesh is yellow, quality good. Tree vigorous and productive. Keeps well in storage.

CORTLAND. An improved McIntosh ripening about two weeks later. Large, beautiful dark red, flesh melting, fine grained, juicy. A superior dessert variety.

RED DELICIOUS. See illustration page 17. A fine dessert variety. Turns completely red before ripe. Large size, wonderful quality, has a delightful aroma, and a wonderful flavor. Ripens October.

MACOUN. A new red Apple of the McIntosh type. Better quality than McIntosh, ripens later, keeps better. Introduced and recommended by the New York State Experiment Station.

BALDWIN. No Apple has ever been found to take the place of this fine variety. Large, round, bright red, good keeping Apple. Noted for its eating and cooking qualities. Ripens in October.

NORTHERN SPY. One of our best known and most delicious Apples. Tree very vigorous and hardy. Ripens late October or early November.

YELLOW DELICIOUS. A bright, golden yellow Apple of excellent quality. Firm, crisp, and very juicy. Splendid keeper. Bears young and heavily.

RED ROME. An improved color sport of Rome Beauty. A large winter Apple with deep red color, firm flesh and superior keeping qualities. A good quality Apple much in demand by commercial processors. Tree is vigorous and bears young.

NEW MONROE. A new late or winter Apple originated at the New York State Experiment Station. Fruits are large, roundish-conic, with attractive bright red color. Flesh yellowish, crisp, juicy with a fine flavor. Tree upright-spreading and an annual bearer. This most promising variety is a cross of Jonathan and Rome Beauty and combines many of the best characteristics of both.

STANDARD APPLE TREES

2-yr., 4 to 5 ft., $1.95 each; 3 for $5.25; 10 for $16.00.

Stanley

DWARF PLUM TREES

Where space is limited and you want fruit quickly plant dwarf Plum. These little trees are ideal for home gardens. They require little space, are easy to care for, and the fruit is as large or larger than that grown on standard trees. Our trees are budded on Prunus Besseyi dwarfing stock. Trees on this stock reach about eight feet when full grown and can be planted as close as nine feet apart. They make nice well shaped trees that are covered with white blossoms in the spring, making them very ornamental. Fruiting begins the second or third year after planting. The trees are winter hardy and easy to grow and produce delicious fruit, making them a fine tree for home planting. **Stanley, Burbank and Santa Rosa varieties.**

Santa Rosa Dwarf Plum

Prices: 2 to 3 ft. trees,

Each $3.50

2 for $6.70

Japanese Plums such as Santa Rosa and Burbank are self-sterile. Plant one of each of these two varieties to insure pollination. Stanley is self fruitful and one tree planted alone will produce good crops of fruit.

Windsor Cherry—Described on page at left.

New Everbearing Peach "Summerlong"

(Plant Patent No. 1503)

This everbearing Peach is one of Mother Nature's own creations. The original tree was found growing near Dayton, Ohio and has survived for 23 years without care or spraying. It has been under observation for the past six years and every year its bearing habits have been the same. The first Peaches start to ripen about July 20th and continue to ripen until about September 20th. This habit of continuous bearing is something new in fruit trees. We have everbearing Strawberries and Raspberries, and now a fine new everbearing Peach. Summerlong has golden yellow flesh, medium to large fruit and freestone. The flesh is very firm, sweet and fine flavored. It is the ideal tree for the home garden because one or two trees will supply delicious fruit for the whole summer. It is remarkable because it has all the excellent qualities of regular Peaches, yet it is hardy, requires no more care than other Peaches. Reserve a spot in your planting for this fine variety. **4 to 5 ft. trees, $2.95 each; 2 for $5.75.**

A Miller Specialty

DWARF

Easy Picking Choice Peaches

New DWARF PEACH TREES

Picture a symmetrical little tree loaded with luscious full sized Peaches. One that never will grow taller than 6-7 feet. A beautiful ornamental, covered with soft pink flowers in the spring. That's the new Dwarf Peach which we bud on a special rootstock. Trees on this stock always retain a dwarf form, are hardy, and make a shapely, long lived tree. You can plant them as close as 8 feet apart. Yield is slightly more than a half bushel per tree when full grown, and the fruit is better colored and slightly larger than standard trees. These little trees are easy to care for and you can pick all the fruit from the ground without a ladder. Best of all you don't have to wait long to get fruit. They usually start bearing the next year after planting. **2 to 3 ft. trees, each $3.25; 2 for $6.25.**

Red Haven Golden Jubilee Hale-Haven
Elberta Sun Haven

Hale-Haven

PLANT DWARF FRUIT TREES

Enjoy delicious fruit two or three years after planting. Easy to grow and care for.

FULL SIZE FRUIT ON DWARF SIZE TREES

Dwarf Bartlett Pear Tree

DWARF PEAR TREES

These small trees often bear fruit the first year. One customer tells us his dwarf Bartlett produced 17 Pears just four months after planting. While this may be a little unusual they always bear the second year if planted on good soil and given average care.

Our dwarf Pear trees are propagated by budding on Quince roots. This is the only known method of producing dwarf Pear trees. Not all varieties do well on Quince roots. We are listing the four varieties that make a good union with the stock and are productive. Plant them 10 feet apart. Ultimate height 8 to 10 feet.

New

DWARF NECTARINE - NECTACREST

Nectarines are one of our most delicious fruits but New Nectacrest developed at the New Jersey Experiment Station is by far the best of any. It has the sweetest, finest flavor of any we have tasted, combining all of the best flavors of a Peach. Medium to large size fruits are most attractive with bright red cheeks shading to pink. The white flesh comes free from the pit and has a fine texture with the most delightful flavor blends. Tree is hardy and vigorous and as easy to grow as a Peach. Hardy to 10-15 below zero. Self-fertile, one tree will produce abundantly. Standard trees grow to about 12 feet, dwarf to 6-7 feet. Ripens September 1st to 10th. Enjoy a new adventure in fine eating. Plant new Nectacrest. **Prices: Dwarf trees, $3.50 each; 2 for $6.70.**

WHAT'S BEST IN DWARF APPLE TREES?

How to select best type dwarf tree (see page 12B).

DWARF APRICOTS

Here is a valuable new addition to our growing list of dwarf fruit trees. Now we are growing Dwarf Apricots. These are budded on a hardy dwarfing rootstock that limits the size of the tree to about 8 feet in height. You can plant them as close as 8-10 feet apart. In the spring hundreds of showy, pinkish white blossoms cover the tree making it a most attractive ornamental. Dwarf Apricots usually start to bear the second year after planting and the full sized golden yellow fruits ripen in midsummer. These sturdy, compact trees are ideal for planting in the home garden or where space is limited.

EARLY GOLDEN MOORPARK

2-3 ft. trees, $3.50 each

DWARF NORTH STAR CHERRY

This new dwarf Cherry is so hardy it will succeed farther north than any other Cherry. It is a cross between a very hardy Siberian Cherry and the well-known English Morello. The fruit is large to very large, clear bright red, with tender skin and a rich full flavor. Fine for eating and makes delicious pies. The original tree growing near Minneapolis has never failed to bear from the time it was planted some years ago. It is self-fruitful and very hardy. No injury was observed and it produced a full crop after 25 below zero. Ripens from mid to late July. Though the original tree is little more than 6 feet tall it has always produced a heavy crop of top quality fruit. You will like these well formed shapely trees that add so much to a fruit planting. **2 to 3 ft. trees, $3.25 each; 2 for $6.25.**

Miller's Recommends these Garden Beautiful

Philadelphus, Silver Showers

NEW SILVER SHOWERS

(Philadelphus)

This new Mock Orange is especially outstanding because of its attractive flowers, exquisite fragrance and compact form. Fine where you need a low growing, compact plant. Never grows over 3 ft. tall. Ideal for foundation plantings, gardens or for a border. Fragrant alabaster-white flowers cover the plant in May and June. Extremely hardy, trouble free, easy to grow. Grows on any soil of average fertility. Be first in your neighborhood to own this fine new ornamental plant and enjoy years of beautiful flowers. **Select plants, $2.95 each; 2 for $5.75.**

VIBURNUM WRIGHTII

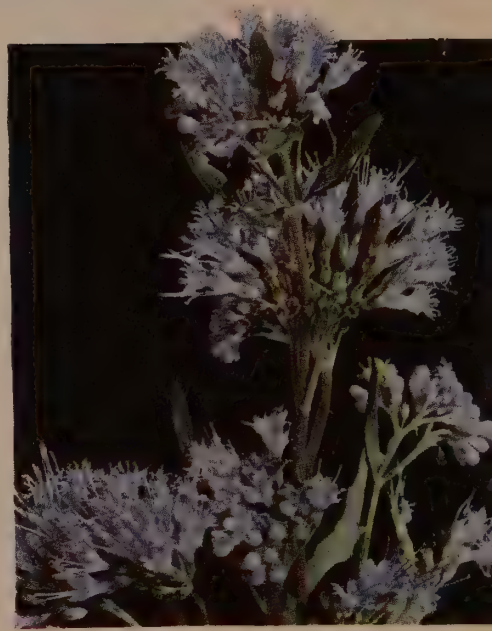
A handsome shrub from Japan. Beautiful from spring until fall. White flowers in early summer are followed by clusters of brilliant berries that last from August to October. These glistening red fruits produce a most colorful contrast against the metallic green color of the lovely oval leaves. In late fall when the foliage turns a rich crimson this worth-while shrub is truly dazzling. Grows 4-6 feet tall in such symmetrical form that little or no pruning is necessary. Ideal for ranch type or low level homes where low growing shrubs are necessary. **Large, 2 to 3 ft. plants, $2.95 each; 18 to 24 in., $1.95.**

Viburnum Wrightii

BLUE MIST SPIREA

(Caryopteris)

One of the really newer outstanding Spireas. From August until freezing weather when few other shrubs are blooming this plant is a mass of beautiful, small, fringed, powdery blue flowers. Every branch and twig is clothed in exotic blue. Makes a compact, rounded plant about two feet tall with shining silvery green foliage. The roots are very hardy but the tops die back during the winter. Cut off the old tops in early spring and new growth springs up with flowers more beautiful than ever. **No. 1 plants, $1.50 each; 2 for $2.75.**



The Exotic Blue Mist Shrub

These are all top rated varieties named on the recommended list by a panel of Lilac experts. Varieties illustrated at left: Top, Leon Gambetta; then left to right, Pres. Grevy, Edith Cavell and Chas. Joly.

Beautiful FRENCH LILACS

Colorful, double flowers of incomparable fragrance. These improved hybrid types do not sucker or spread but make an extremely well formed plant 8-10 feet tall. Few flowers can offer such sweet scented, rare fragrance and lovely soft shades with flower panicles 8-12 inches long. The kinds we sell are all double flowered and the plants usually bloom the first year with increased bloom each following year. They are most desirable for lawn specimens, corner groups and fine flowering hedges when planted 5 feet apart and trimmed to the deisred height.

LAVENDER—Leon Gambetta. Strong grower, sparkling fresh color with double fragrant flowers.

BLUE—Pres. Grevy. Soft blue lovely flowers in large clusters One of the best.

WHITE—EDITH CAVELL. Pure double white flowers in large clusters.

REDDISH PURPLE—Chas. Joly. Beautiful dark wine colored panicles, very fragrant, large double blooms.

Strong, 18-24 in., $1.75 each; 2 for $3.25.

Flowering Shrubs for Smart Landscaping

Beautiful BLUE HYDRANGEA

(Nikko Blue)

This new hardy strain grows immense flower heads 6-12 inches across. The flawless blue flowers make it one of the most strikingly beautiful of all shrubs. It grows best in full or partial shade and makes a well rounded shrub 3-4 ft. tall. On alkaline soil flowers are pink but can be easily changed to blue by watering twice each month during the summer with a tablespoon of aluminum sulphate dissolved in a gallon of water. Where winter temperatures go below zero mound the plants with 10-12 in. of soil before severe freezing occurs. **Heavy, 2-yr., No. 1 plants, $1.75 each; 2 for $3.00.**

BURNING BUSH (Euonymus Alatus Compactus)

One of our most unusual and beautiful shrubs. Each season brings a different color. Small yellow flowers in May followed by red berries in June. Throughout the summer the foliage is a rich striking green. In the fall the whole plant is a brilliant crimson-rose-red. Unusual corky bark adds to its attractiveness in winter. Very hardy and not particular as to soils. Grows in symmetrical, compact form to 4-5 ft. Outstanding as a specimen plant and makes one of the best hedges because it grows in such perfect form without pruning. **2-yr., Select, No. 1 plants, $2.95 each; 2 for $5.40; 10 for $21.00.**

DOUBLE MOCK ORANGE

(Philadelphus Virginal)

Double, pure white blossoms two inches or more in diameter with the most exquisite fragrance cover the branches of this exceptionally fine shrub. Grows to about six feet and can be pruned as desired. Hardy in the coldest winters and grows well on almost any type soil. No plant can quite equal the sweet smelling fragrance or beauty of the snow-white flowers. **2-3 ft., $1.50 each.**

Double Mock Orange

Magnificent Purple Fringe SMOKE TREE (Below)

Makes a large shrub up to 10-12 feet tall, 6 feet wide. In July-August it is covered with feathery flowers like a cloud of lilac-purple smoke. The green foliage colors beautifully in the fall to yellow and orange. Grows well on a wide range of soils from the Gulf coast to central New York. **18-24 in., $1.50 each; 2 for $2.75. 2-3 ft., $1.95 each; 2 for $3.75.**

Pink Flowering Almond

PINK FLOWERING ALMOND

One of the best early blooming small shrubs. Blossoms right after Forsythia. Every branch and twig is completely covered with beautiful, rosy pink, double flowers. The flowers appear before the leaves so that when in full bloom the plant appears like a beautiful pink cloud. Grows only 3-4 feet high so every home should have room for one of these all time favorites. **18-24 in., $1.25 each; 2 for $2.50. 2-3 ft., $1.60 each; 2 for $2.95.**

SPARKLING NEW SHRUBS of Flawless Beauty

Beautiful BLUEBIRD

Completely new. No variety can compare with the flawless blue of this new Althea. Gardeners will welcome this glorious newcomer to the small but choice list of colorful, all-summer-flowering shrubs. Its large, 5-inch flowers stand out like pert saucers. Stunning in shrub plantings or as a specimen. Bluebird is vigorous in growth and upright in habit. One of the few shrubs that bloom with such unrivaled beauty from early summer until frost. Grows in compact, symmetrical form to about 6 feet. It is as hardy as the other Altheas. Plants set this spring will bloom profusely this year. **Strong, grafted, 2-yr. plants, 12-18 in., $2.75 each. 18-24 in., $3.25; 2 for $6.25.**

Cherokee Chief
Red Flowering Dogwood

Cherokee Chief RED FLOWERING DOGWOOD

New Different Outstanding

Once in a great while, the wonderful workings of nature produce a truly outstanding plant possessing the good traits of its parents and further endowed with beauty and merit far beyond that of its predecessors. Such a plant is "CHEROKEE CHIEF." Colorful blooms before leaves appear in spring, luxuriant green foliage all summer turning bright scarlet in fall, bright red berries in fall and early winter, plus an interesting branching habit makes the flowering Dogwood one of America's most handsome trees with a special interest for every season of the year. Blooms a beautiful deep red. **2-3 ft., $4.50 each.**

NEW BEATRIX FARRAND FORSYTHIA

Hundreds of golden yellow flowers cover this plant in a beautiful yellow cloud of bloom. The first flowering shrub to bloom in the spring. If you want to be sure to have these fine flowers every spring, plant Beatrix Farrand. It never misses. Other Forsythias freeze back in cold winters but not this one. At the Arnold Arboretum where this superior plant originated it was the only Forsythia to bloom above the snow line after the severe winter of 1957. Flowers are large, over 2 inches across, bright yellow with a striking orange throat. Nice clean, glossy green foliage and attractive shape make it especially desirable and superior to any other variety. Besides being a fine specimen plant it is especially useful as a screen or hedge. Grows about 8 feet tall. **2-3 ft., $1.95 each; 2 for $3.75. 18-24 in., $1.50 each; 2 for $2.75.**

Cardinal Shrub

CARDINAL SHRUB

(Weigela Vaniceki)

Among the hundreds of flowering shubs Cardinal Shrub ranks among the five best. It has everything: beautiful color, unbelievably abundant blooms over a long season, hardiness and attractive green foliage on a well formed, shapely plant.

Starting in May this unique plant stages a glamorous show of breath-taking color. Many hundreds of trumpet-like flowers clothe the plant in brilliant cardinal-red from top to bottom. After this first mass of bloom lesser numbers of flowers appear as sparkling jewels against the deep green foliage until frost. Cutting flowers for bouquets makes for more abundant flowers later in the season. Grows well in sun or shade and makes a shapely, attractive bush about 6 feet tall. Perfect for an untrimmed hedge or screen. Grows well in most every part of the country. Hardy at 15 below zero. For that splash of color that will make your garden outstanding, plant Cardinal Shrub. Plants set in the spring will bloom this season. **Strong, vigorous plants, 2-3 ft., $1.95 each; 2 for $3.75. 18-24 in., $1.75 each; 2 for $3.25.**

Beatrix Farrand Forsythia

Beautify Your Home With ORNAMENTAL TREES

MAGNOLIA SOULANGEANA

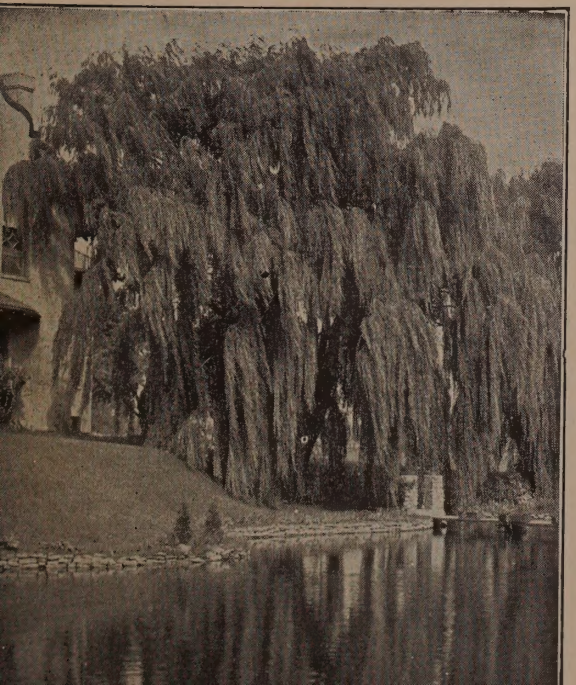
(Saucer Magnolia)

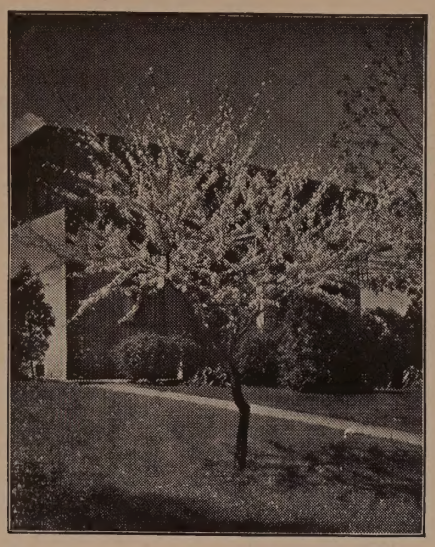
One of our most beautiful ornamentals. Blossoms appear before the leaves. The fragrant flowers open light purple at the base, shading to pink at the tips, with inside of petals clear pink to white. Deep green, waxy foliage follows the flowers, for a restful mass of cool green for the summer. It grows in an upright tree form to 12 and 16 feet. Grows well in any soil that is well drained. As a lawn specimen this beautiful shrub attracts more attention than any other. **2 to 3 ft., $3.95 each.**

WISCONSIN WEEPING WILLOW

There are few trees that can be used to such advantage for cheery winter effects. Grows fast, adapted to a variety of soils and uses. Is very hardy, and beautifully effective near pools, along drives and on lawns. Grows 25 to 30 ft. tall. **5 to 6 ft., each $2.25.**

Wisconsin Weeping Willow





REDBUD

Hundreds of rosy lavender blooms appear before the leaves develop. The dainty pink flowers are so densely matted that the tree appears as a small pink cloud. We recommend this tree as one of the best for planting on small lots. It grows from 15 to 20 feet making an excellent small shade tree. It is not particular as to soil nor subject to attacks by insects or disease. Plant Redbud for beauty and shade. **4 to 5 ft. trees, $2.25 each.**

CUT LEAF WEEPING BIRCH

Graceful weeping branches and clean white bark make this one of our most beautiful ornamental trees. Even in winter, without foliage, the delicate pendulous branches make a lovely silhouette. While it is not too particular as to soil, it prefers a moist location and a sunny spot. About 35 ft. at maturity. **5 to 6 ft., $3.95 each.**

CORNUS FLORIDA

(White-flowering Dogwood)

The rare beauty of Dogwood in spring when it is white with bloom, or in summer with its dark green foliage changing in the fall to gorgeous reds, is hard to equal. It is one of the loveliest of trees. Conspicuous flowers, appearing early in the spring, are 3 to 3½ inches in diameter. A Dogwood makes a beautiful lawn or shrub border specimen. 15 feet. **2 to 3 ft. trees, $2.50 each.**

LOMBARDY POPLAR

Good for Wind Screens

Tall, fast growing, spire-like tree. Adapted to wide range of soils. Ideal for screening, windbreaks, and backgrounds. When used for these purposes, plant 5 to 6 ft. apart. **5 to 6 ft., each $1.00; 10 for $7.50.**

Cut Leaf Weeping Birch

Cornus—Flowering Dogwood

Lombardy Poplar

AMUR MAPLE (Acer Ginnala)

This tree is perfectly suited for today's ranch type homes where a tall growing tree is out of place. Discovered in Asia and introduced here it is fast becoming one of our most popular shade trees. Extremely hardy, it will stand 30 below zero yet grows well in warmer locations. The first foliage is reddish brown, soon giving way to a healthy green. Cream colored blossoms follow in May and these develop into striking red fruits that are most attractive during the summer, especially so in contrast to the dark green leaves. Best of all is the fall color, when the leaves turn a flaming brilliant scarlet and are equal in color to the finest Sugar Maple. Moderately fast growing, it reaches a height of 20-25 feet. Free from disease and easy to transplant, it requires practically no care. There are few good small shade trees and Amur Maple is one of the best. It is tops on the list of small shade trees of most all of our leading horticulturists. **3-4 ft. trees, $3.55 each; 4 to 5 ft. trees, $4.45 each.**

WHITE CLUMP BIRCH

In naturalization, or as a lawn specimen, this lovely, multiple-stemmed tree is most effective. The white bark of its three or more trunks adds great charm to the landscape picture. Growth is gracefully upright, with horizontal branches. Reaches a height of 30 to 35 ft. **3 to 4 ft., $3.00 each.**

White Clump Birch

HOPA FLOWERING CRAB

From early spring until freezing weather this tree will be a delight to you. In the spring the expanding foliage is bronzy red, but before the leaves are fully developed the whole tree bursts into bloom, being completely covered with the most magnificent fragrant pink flowers. It is hard to imagine anything more showy. After blossoming hundreds of miniature bright red fruits cover the tree and these not only create fall color interest but make fine jelly. **3 to 4 ft., $1.95 each; 4 to 5 ft., $2.25 each.**

KWANZAN FLOWERING CHERRY

Each spring when the Flowering Cherries bloom at Washingto, D. C., people marvel at this beautiful display of color. Why not duplicate this in miniature on your lawn by planting several of these distinctive flowering trees. They are easy to grow, hardy and grow in stately form. Dainty, double, rosy pink flowers cover the tree, and the pink loveliness of the blossoms is of unequaled beauty. Grows 15-20 ft. and trees planted this spring will bloom next year. **3-4 ft. trees, $3.50 each.**

GOLDEN CHAIN TREE (Laburnum Vossi)

Glistening golden yellow flowers in long, 12- to 18-inch clusters much like Wisteria cover this rare, beautiful tree. Starts blooming late May and for two weeks this low growing tree is a cloud of golden yellow. Grows well in full sun or partial shade. Unusual Clover-like leaves and decorative green bark add to its attractiveness. Grows to 15-20 ft. Hardy in zone 5 (10-20 below zero). We recommend spring planting only. **2-yr., 3-4 ft. trees, $4.50 each; 2 for $8.50.**

MOUNTAIN ASH

Lovely Berried Tree—Attractive to Birds

The drooping clusters of brilliant, orange-red berries contrasted against the beautiful soft green leaves make this a most distinctive ornamental tree. Hardy and well adapted to all conditions. 18 to 25 ft. **4 to 5 ft., $3.50 each.**

DISTINCTIVE PIN OAK

The Oaks are grand trees, stately, strong limbed with glistening green summer foliage and brilliant fall color. Pin Oak is probably the best of all the Oaks for home plantings. It is the fastest growing of any of the Oaks and because of its well developed, fibrous root system the easiest of any to transplant. It grows almost as fast as an Elm and reaches a height of 30-40 ft. The trees are not bothered by insects or disease and grow well on almost any type soil. It does make slightly better growth on soils that tend to be a little on the acid side. It grows in a picturesque pyramidal form. The deeply cut leaves are especially attractive and the dense foliage provides plenty of cool shade. Autumn brings a dazzling show of color. The leaves turn to brilliant shades of scarlet and the whole tree appears as a pyramid of crimson. **4 to 5 ft. branched trees, $3.95 each; 5 to 6 ft., $4.45 each.**

RADIANT RUBY TREE (Prunus Newport)

The leaves glisten in shades of reddish purple throughout the entire growing season. Grows 10-12 feet tall and does well under hot, dry conditions. The leaves attain their best color when growing in full sun. Small pink flowers in April followed by brilliant ruby leaves make this an outstanding small ornamental tree. **2-yr., 4-5 ft. trees, $2.50 each; 2 for $4.70.**

PRINTED IN U.S.A. BY A. B. MORSE COMPANY, ST. JOSEPH, MICHIGAN

Beauty and Cool Comfort

Hopa Flowering Crab

NEW CRIMSON KING MAPLE

(Plant Patent No. 735)

A beautiful tree to brighten your home landscape. Each spring the sparkling crimson leaves unfold for another season's breath-taking color. Crimson King is a form of the familar Schwedler Maple but unlike it in that the bright red leaves retain their crimson color the whole season. In 10 years of testing it has always kept its rich coloring. Makes a perfect round, symmetrically shaped tree of 25 to 40 ft. at maturity. **5 to 6 ft. trees, $5.95. 4 to 5 ft. trees, $4.95.**

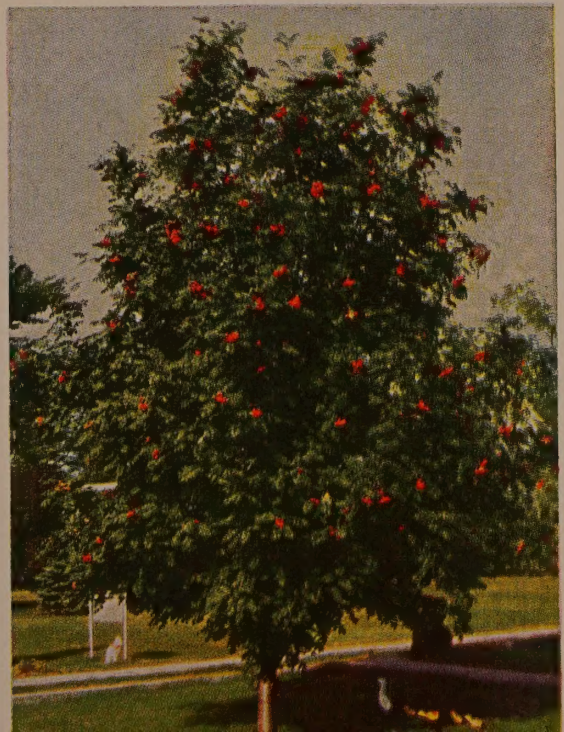
These Choice Specimens Described on Page at Left

Golden Chain Tree

Kwanzan Flowering Cherry

Pin Oak

Mountain Ash



Radiant Ruby Tree

STRATHMORE PYRAMIDAL FLOWERING CRAB

A beautiful new pyramidal type Flowering Crab that grows in an upright form much the same as Lombardy Poplar. The vivid red flowers transform this tree into a pyramid of breath-taking crimson color. Our illustration can not begin to do it justice. The fine attractive leaves are a beautiful reddish color all summer. In the fall the leaves turn to shades of bright orange and scarlet that rival the Maples in color. After the leaves fall hundreds of miniature purplish red Apples cover the tree like shining jewels. These hang on into early winter and are a favorite food of birds. Strathmore blooms the first year and blooms annually, making it far superior to the Crabs that bloom in alternate years. Grows 10-15 ft. tall which makes it ideal for a flowering hedge or screen. Also should be planted as a specimen tree for unusual color effect or for corner plantings. Extremely hardy, will stand 30 below zero. You will want to plant Strathmore because it is easy to grow and has outstanding color interest in spring, summer, fall and winter and is one of the few pyramidal flowering trees of distinctive beauty. **2-yr., 3-4 ft. branched trees, $2.85 each; 2 for $5.20; 10 for $22.50.**

Pyramidal Flowering Crab

New Sunburst Thornless Locust

NEW SUNBURST® THORNLESS LOCUST

A Story of Loveliness in Your Garden

Easy to Grow. You'll have no trouble with SUNBURST, it's easy to plant and grows rapidly in almost any soil. Exceptionally hardy, it withstands extremes of heat and cold, moisture and drought. SUNBURST is one of the strongest trees known and readily survives ice, snow and wind storms. It is practically immune to disease and insects. Grows 25-35 ft. tall.

Stately Form. Experts recognize the Honey Locust as the successor to the Elm. The new SUNBURST grows with a natural eye-pleasing symmetry.

No Maintenance Problem. Producing only male flowers, SUNBURST is absolutely seedless and causes no ground litter. The small leaves of SUNBURST, when shed, disappear in the grass, eliminating the necessity of raking.

Spectacular New Color. SUNBURST is the first new color in a hardy, ornamental shade tree in years. Branch tips of bright golden yellow, shading to bronze at the ends, contrast sharply with the rich green inner foliage to make it look like a flowering tree bursting with bloom. SUNBURST keeps this beautiful spring appearance all summer.

Ideal for Lawns. SUNBURST'S brilliant, contrasting coloring and graceful form make it ideal for lawn and background planting. Its lacy, sun-dappled shade actually benefits a fine lawn.

4-5 ft. branched, $5.95 each. 5-6 ft. branched, $6.65 each.

ALMEY FLOWERING CRAB

New Fiery Crimson Sensation

Glistening fiery crimson blossoms as large as silver dollars cover the branches to the tips. One of the most beautiful flowering Crabs in America. In addition to the spring show, autumn brings another spectacle of beauty. After the leaves fall the small scarlet fruits cling to the branches, creating another high spot of color into the winter. Almey has very early blooming habits. The trees start to bloom in the nursery row and you can expect blossoms the year after planting. The tree grows to 12 to 15 feet in height. It will grow and thrive on poor soil and is very hardy. It is a beautiful tree for small gardens or any spot that needs a show of brilliant color. **2-yr., 3 to 4 ft. trees, $2.50 each; 2 for $4.75. 2-yr., 4 to 5 ft. trees, $3.25 each; 2 for $6.25.**
